## CERTIFICATION

### Complete Modern JavaScript Firebase

#### BootCamp for the beginner

It was a 6-hour Bootcamp organized by KIM CHAN, that encouraged hands-on training in web technologies. It helped I learn Javascript.

## PROJECTS

### Movie-App(recommendation app) | Working with API

It is a movie app in which the home page is a trending page. you choose movies to watch and can add to your favorites. It is **React JS**-based Project in which **Class based function** is used. In this web app, I also explore the feature of **Local storage, routing, and API call**.

### SALAAH (ONGOING PROJECT) | Frontend Developer

Mar 2022 – Present | ABESEC, Gzb

It is a patented group project which is being made for the college mentor community. We're working to create a professional alumni network using the **MERN** stack. I'm working on ReactJS with the frontend team that deals with **Props, Hooks, Routing, and Chakra-UI**. The project consists of social media like profiles, chats, and feed interface. Some libraries and technologies being used are **Redux, Socket.io, Multer, Formik**.

## ACHIEVEMENT

- **4 star in C HACKERRANK**
- **4 star in C++ HACKERRANK**
- **2 star in JAVA HACKERRANK**

## EXTRA CURRICULAR

### Technical Lead, Salaah The Mentor Community

**SEPT 2022 – Present**

the technical team of 4 members, in which we're working to create a website for building an Alumni network for the college. We also conduct online and offline technical & soft-skills podcasts impacting over 1000 students in the college.
